DETAILED ACTION

1. This application has been examined. This application is a continuation of serial number 10/204,177, filed February 13, 2001, now US Patent 6,,675,821, issued January 13, 2004. Claims 1-16 are pending.

Claim Rejections - 35 USC § 101

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. Claims 1-8 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-8 of prior U.S. Patent No. 6,675,821. This is a double patenting rejection.

Allowable Subject Matter

4. Claims 9-16, drawn to a flow system having a branch point for dividing flow of particle-containing liquid, measuring equipment for providing a signal of the flow of particle-containing liquid in an observation area, and a kinetic pump responsive to a signal from the measuring equipment, are allowed.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See the attached listing of prior art cited in the parent application.
